Sec. 14.20. License classifications.

North American Industrial Classification System (NAICS) identification (sector/sub-sector) numbers are required as a part of the periodic reporting requirements for every business. For municipal business license purposes, each taxpayer must be minimally classified as required by Code of Alabama, §11-51-90B. The descriptions listed beside each NAICS code incorporate examples of each category; however, these examples are not all inclusive. A business is classified and licensed based upon the business activity or activities which it conducts within the city. Each business will be placed in the NAICS sector/subsector which best matches its activity or activities and shall pay a license tax based upon the corresponding schedule assigned to its description unless otherwise specified. The city may assign additional digits of each NAICS code for reporting purposes and proper administration of this article.
